Dosing pump Pro

The new Dosing Pump Pro series is an innovative and highly refined dosing pump for marine aquariums. It allows for precise dosing of minerals, trace elements and other supplements into the aquarium. The quiet, bi-directional stepper motor offers a range of entirely new possibilities. The proprietary, ultra-accurate Reef Factory pumps are an excellent way to take dosing in a marine aquarium to the next level.

Key features

- Exceptional precision - dosing starting from 0.01 ml
- Pump efficiency of up to 9 ml of liquid per minute
- Silent operation of proprietary dosing pumps
- Highly accurate stepper motor
- Bi-directional operation with the ability to reverse the liquid flow (enabling dosing of phytoplankton and food)
- High chemical resistance BPT material used for the tubing
- Compact size and modern design
- Easy installation in the sump using a DIN rail
- up to 48 doses per day

Smart functionalities

- Free and user-friendly Smart Reef application for Android, iOS, or computer (browser-based support)
- Creation and modification of flexible dosing schedules
- Automation of the dosing process based on real-time parameters levels
- Ability to specify the direction of pump rotation
- Quick modification of dosing settings and the ability to add extra doses outside the schedule
- Dosing in ml or percentage (%)
- Clear history of dosing activities
- Remote aquarium management from anywhere in the world, 24/7
- Information about the remaining amount of liquid in the container for dosing
- Intuitive and fast calibration process ensuring high dosing precision, with push notifications reminding about the need for recalibration
- Import and export of dosing schedules
